(54) Title: A BUILT-IN LIGHT FITTING FOR FIRE PREVENTING

(54) 发明名称: 一种嵌入式防火灯具

(57) Abstract: The invention discloses a built-in light fitting for fire preventing, which comprises a hood. A heat elimination opening is arranged on the hood. There is a heat elimination hole on the corresponding position of an intumescent sheet for fire preventing, and/or between the edge of the intumescent sheet and the edge of the heat elimination opening. The heat elimination opening and the intumescent sheet for fire preventing on the hood are so arranged that the light fitting may be heat eliminated normally in the general case, and in the event of fire the heat elimination opening is enclosed of itself due to quickly expanding of the intumescent sheet for fire preventing. Therefore, the hood may prevent fire from propagating from the interior to the

exterior
